## SKYWIDESYSTEMS

License renewal procedures

The tandem instructor/tandem examiner rating must be renewed annually.

For the renewal, the tandem instructor must meet the requirements specified in the table below.

Time Period	TI's Experience less than 500 tandem jumps	TI's Experience more than 500 tandem jumps
Timeout up to 1 month	At least 1 tandem jump per month, at least 15 tandem jumps per year.	
Timeout from 1 to 3 months	Under the supervision of another TI, perform at least 1 training jump with experienced jumper (at least 100 jumps) acting as a passenger.	At least 1 tandem jump in 3 months, at least 15 tandem jumps per year.
Timeout from 3 to 6 months	Supervised by another TI, perform at least 2 training jumps with an experienced jumper (at least 100 jumps) acting as a passenger. One of the jumps can be done solo.	Supervised by another TI, perform at least 1 training jump with an experienced jumper (at least 100 jumps) acting as a passenger.
Timeout from 6 to 12 months	Supervised by another TI, perform at least 3 training jumps with an experienced jumper (at least 100 jumps) acting as a passenger. One of the jumps can be done solo.	Supervised by another TI, perform at least 2 training jumps with an experienced jumper (at least 100 jumps) acting as a passenger. One of the jumps can be done solo.
Timeout more than a year	Re-certification	Re-certification

It is mandatory for the tandem instructor to conduct additional ground training before renewal jumps. In case if these requirements are met, please:

- Fill in the form and sign it from the tandem examiner or the owner of the tandem system.
- Send the form, a copy of valid medical certificate, and payment for the license renewal to SWS Academy.

We recommend you to keep the copies of your documents, in case if the form is lost on transfer.

Contact SWS Academy if you do not receive your renewed license in 2 weeks.

Performing tandem jumps with an expired license corresponds to performing tandem jumps without a license at all, and it is illegal.

Unfilled documents will not be considered.

### Training jumps

The experienced jumper must be first briefed on how to respond to tandem emergencies.

The applicant must demonstrate the ability to control heading during drogue-fall by making at least one 360-degree turn and perform practice pulls to all operating handles. During the training jump the applicant must make a stable exit from at least 2300 meters, with drogue deployment within 5 seconds and pulling out the drogue release by 1700 meters.

The landing should be comfortable and within 50 meters from the target.
